

Hiking Heroes Projects

BIRD FEEDER

This August, Hiking Heroes met and created environmentally friendly bird feeders together. The process consisted of cutting oranges in half and scooping the fruit out from the peels. We then poked holes in the empty orange “cups” and pulled strings through them. The cups were filled with bird seeds, and the feeders were then hung up on trees using the string!

There are many benefits of making bird feeders this way. They attract wildlife, and the orange peels are biodegradable. That way if the feeders are somehow relocated, you can rest assured that they will not harm the environment. Try making one yourself!

BULLETIN

One summer project that the Hiking Heroes worked relentlessly on was the Hiking Heroes Bulletin. The Hiking Heroes Bulletin is a periodical that contains written and artistic pieces, provided by our club as well as other contributors around the world! Some features in the bulletin include an article on composting, a visual on how to recycle a plastic bottle correctly, and some environmental-related artwork. Our Hiking Heroes Club has worked tirelessly to write, edit, and design this bulletin. It will be coming out soon!

SERVICE AWARDS

This summer, Hiking Heroes received a President’s Volunteer Service Award. This award was given to Hiking Heroes because the service hours of each and every member combined reached 1,000 hours of service! We are very proud of all our members, and we hope to see these kinds of achievements in the future as well!
